

AVENTOS Spring Tension Adjustment Instructions

ADJUSTMENT INSTRUCTIONS for AVENTOS

Any adjustment of Aventos Hardware must be done with the recommended bit. Using any other bit will nullify any hardware warranty.

Bit needed for adjustment will be included with every AVENTOS cabinet

Warning

Risk of severe injury by spring-loaded arm. DO NOT push arm down when door is not attached.

When installing or removing, ensure arm is left in "UP" position. It is recommended that arms are removed during cabinet installation.
