

Roberto Doors and Panels Care

Due to their resistant and hygienic surfaces, the Roberto textured wood grain boards do not require any special maintenance. The surface is generally easy to clean. The recommended cleaning methods according to the degree of soiling are as follows:

LIGHT SOILING:

Clean with a soft clean cloth, dry or damp. If using a damp cloth, use a solution of mild dish soap and warm water then dry the surface with a dry, absorbent soft cloth (microfiber is best).

If chemical or staining liquids are spilled on the surface, wipe it off immediately and wash the surface with warm soapy water, rinsing several times to eliminate any residue.

AVOIDING STREAKS:

Streaks often form when the surface is cleaned with organic solvents, together with cold water and old cloths. To ensure no streaks occur when cleaning, we recommend wiping the surface down with warm water and then drying it using normal paper towels or microfiber cloths.

NORMAL SOILING:

Clean with warm water, a clean soft cloth or microfiber cloth, a soft sponge or soft brush. Use mild dish soaps that have no abrasive ingredients. Then wipe with fresh water, removing all traces of the cleaning agent, to prevent streaks from forming. Dry the surface with a clean, absorbent cloth or paper towels. Avoid harsh household cleaners and abrasives. The following cleaning agents should **NOT** be used under any circumstances:

- Scouring and abrasive agents (abrasive powders, scouring pads, steel wool)
- Polish, washing powder, furniture cleaner, bleach
- Detergents with strong acids and acidic salts
- Steam cleaning equipment

Always check the active ingredients of your cleaners for potentially harmful chemicals. Do not use acetone, ammonia, amylacetate, benzene, butyl acetate, butyl alcohol, caustic soda, cellulolve, chlorinated solvents, chloroform, cresols/phenols, dichloromethane, ethylacetate, glacial acetate acid, halogenated solvents, methyl alcohol, methyl ethyl keytone, thinners, toluene, or xylene.
